

Amendments to the Specification

Attached are amendments to the specification including paragraphs replaced and added in accordance with 37 CFR 1.121(b)(1), as well as amendments to the claims in accordance with 37 CFR 1.121(c).

Instructions for Adding and Replacing Paragraphs

Please replace paragraphs [0043-0044] with the attached paragraphs [0043-0045] and renumber all subsequent paragraphs accordingly.

Text of Replacement Paragraphs Added to Specification

[0043] The saddlebag bracket 51 shown in Fig. 2 is comparable to a Cruiselineer Saddlebag Mounts Part No. KIT-SB103, commercially-available from National Cycle, Inc. The Cruiselineer Part No. KIT-SB103 mounts to a motorcycle and provides a standardized arrangement of connections for mounting various commercially-available saddlebag cargo containers that have the same standardized connections.

[0044] Similar brackets are designed to mount to a structure of a specific make and model motorcycle. These similar brackets provide an interface between connections provided on the cycle structure and the abovementioned standardized connections provided on various ~~certain~~ commercially-available saddlebag cargo carriers.

[0045] In one embodiment of the product, the product mounting means can be configured to correspond to the standardized connections provided on various ~~certain~~ commercially-available saddlebag cargo carriers. This embodiment of the product can mount to the saddlebag bracket interchangeably with the saddlebag cargo containers, providing the

saddlebag cargo containers have the abovementioned standardized connections.
